## 2021 - present IQVIA IMS Health - Healthcare - Seattle - USA (100% english)

At the present I'm currently working on the Engineering PXD Team of IQVIA (world's leading healthcare company).

100% in English, sprint iteration occurs with Agile Scrum mode enabled.

Product maintenance based on a proprietary design system that is assembled on a React library and the Salesforce design system: Lightning Design System (SLDS). Also, creation on demand of new components following closely requirements from stakeholders and to the letter ticket's Acceptance Criteria. The cycle of software development and production delivery is constantly in relation with designers, PMs and POs.

- Production ready frontend development.
- Latest CSS best practices + preprocessors orientation SASS.
- Design system focus. (Salesforce Design System).
- Web components standards - Salesforce development LWC + React library maintenance.
- Agile, Scrum mode.
- Git and Gitlab. CLI. Jest TDD.
- Jira. Zeplin - InVision - Figma. Teams - Slack.
